DeckMark Product applies to manufactured products.

DeckMark Plus is a complementary part of the DeckMark Product Manufacturing Certification Scheme. It identifies an individual manufactured component, or an assembly made from such components that have undergone additional specific technical or safety evaluations by a recognised quantitative procedure. These tests and evaluations are over and above the requirements of the Scheme and are provided by the manufacturer to support professional specification of the product with clear evidence that the component assembly will perform its design function e.g. Slip resistant decking or load tested parapets.

DeckMark Installer applies to decking installation companies.

APPROVED DECKING RETAILERS

Members of the Approved Decking Retailer scheme supply DeckMark® accredited materials from TDCA manufacturer members. They are required to have two members of staff undertake and pass a RIBA CPD accredited course on deck design and installation.
