

THE ONLY DECK & OUTDOOR SCREW GUARANTEED AGAINST CORROSION

Square Recess (SQ2)

The ultimate secure drive eliminates cam-out.

Collar

Gives strength to the most vulnerable point of the screw, whilst also allowing a deeper recess and less cam-out for a secure drive.

Single Thread

Drives in the wood without reaming, enabling swift efficient fix with high pull out retention.

Material / Finish

Grade 316 Austenitic Stainless Steel, Net-Coat® treated to guarantee against corrosion on all applications, including:

- Marine & coastal areas
- Polluted environments
- All pressure treated timbers such as: Tanalith® E / ACQ®
- All hardwoods, eliminating tannin staining

Spiral Point

Immediate start.

Ribs

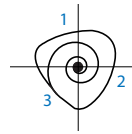

Cutting edge ribs ream and self countersink the screw.

Part Thread

Eliminates 'jacking' where a full threaded screw tends to pull apart the jointed material.

Tri - Lock™ Threadform

Three flats on the thread means that as the screw is driven in there is less surface contact between the screw and timber, allowing less battery wear, easier insertion and the screw will not work loose as the boards are walked upon. No pilot hole necessary in most applications.

Sizes

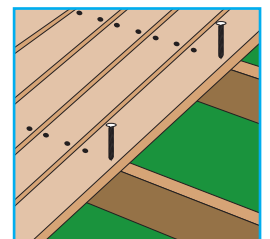

Product Code	Dia (mm)	Length (mm)	Box Qty
TFDS04550	4.5	50	200
TFDS04557	4.5	57	200
TFDS04563	4.5	63	200
TFDS04575	4.5	75	200

THE ULTIMATE CORROSION RESISTANT DECK & OUTDOOR SCREW.

Installation

- Use a quality PZ2 drive bit & install the screw perpendicular to the deck.
- By increasing drill speed as the screw threads into the deck will reduce wood split.
- No pilot hole required in most applications.
- Drive the screw flush, do not overdrive.
- If cam-out occurs, remove and replace. (To eliminate cam-out use an impact driver).
- Use two screws at every joist as shown.

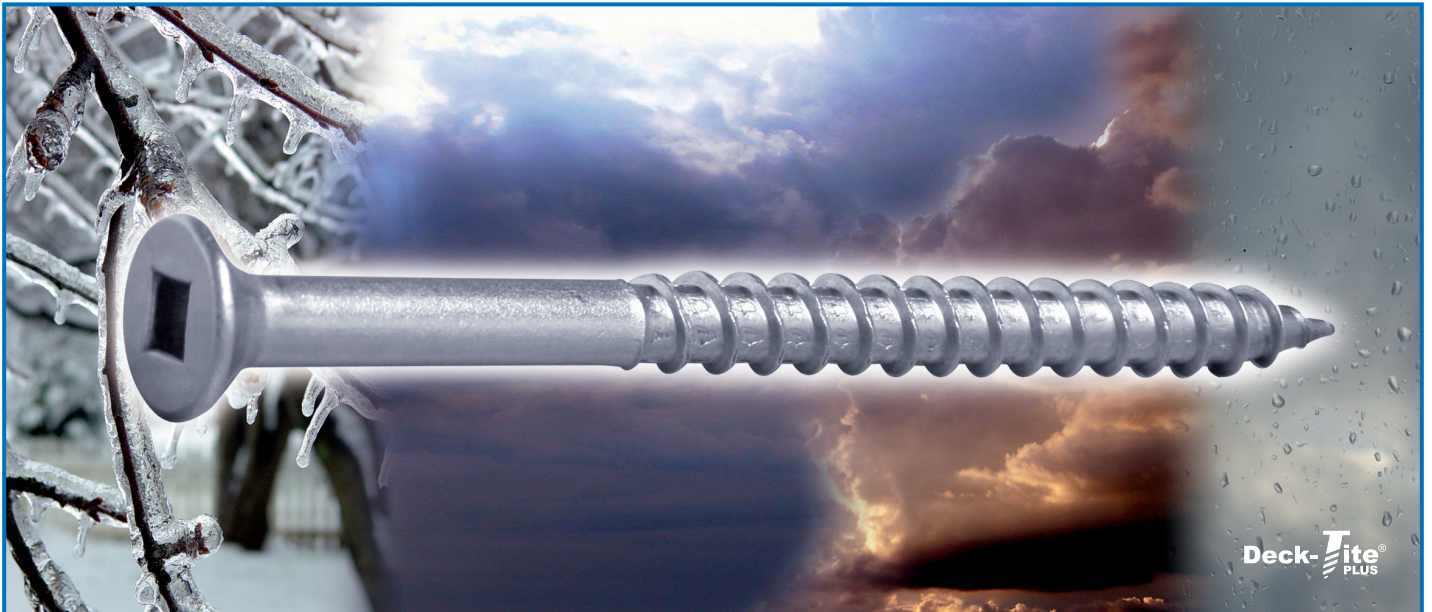

Deck-Tite® Plus is guaranteed to withstand any of the chemicals used in today's timber & hardwoods. It also offers total protection in the most extreme environments such as marine or polluted applications.
"The only deck screw that answers all deck installation concerns."

We are proud that the Timber Decking & Cladding Association recognises the advances we have made by awarding Deck-Tite® Plus with the highly vaunted DeckMark® accreditation.

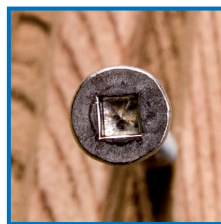

FINALLY SOMETHING THAT CAN WITHSTAND THE BRITISH ENVIRONMENT

Do you want a screw that will not rust or work loose, looks great and will last more than a couple of seasons?

Deck-Tite® Plus is the answer. Manufactured from grade 4 in most applications and surface treated with Net-Coat® Clear coating, Deck-Tite® Plus not only guarantees against corrosion but looks great too! And, what's more, the Tri-Lock® threadform means that the screw will not work loose as the boards are walked upon - no more stubbed toes!

With so much money being invested in quality timber products you don't want to spoil all your hard work using inferior screws which will let you down.... and your reputation!
