

THE ONLY HEAVY DUTY TIMBER / LANDSCAPE SCREW WITH A NEAT FLUSH FIX

Star Recess

Secure & safe - driver bit will not slip out preventing damage to timber. Essential for high torque driving.

Part Thread

Exaggerated part thread - essential for joining heavy duty timber which eliminates jacking.

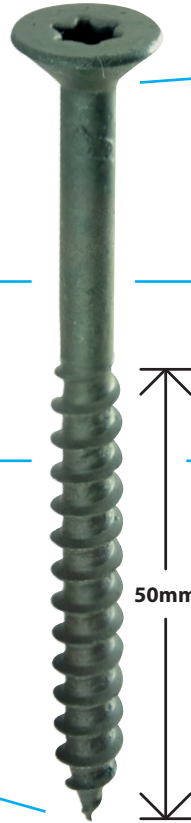

Coarse Single Thread

- Enables a swift efficient fix with high pull-out retention.
- Reduces wood split
- No pilot hole necessary in most applications.

Point

Sharp point which penetrates the wood at first contact.

**Free Driver Bit
in Every Box**

Countersunk Head

The only timber / landscape screw to give a neat flush fix, allowing boards to be fixed directly over the screw.

Strength

Hardened to the strength of a high tensile bolt.

Net-Coat® Green for Outdoor use

Developed for the new pressure treated timber and outdoor use.

Installation

- Make sure you choose the correct length so that threads fully engage the substrate.
- Install using a high torque setting.
- Drive the screw flush, do not overdrive.
- To eliminate cam-out use an impact driver.

Timber-Tite® is a universal, heavy duty timber fixing that replaces cup square bolts and coachscrews for an easy, quick, secure and neater fix.

Timber-Tite® Boxes

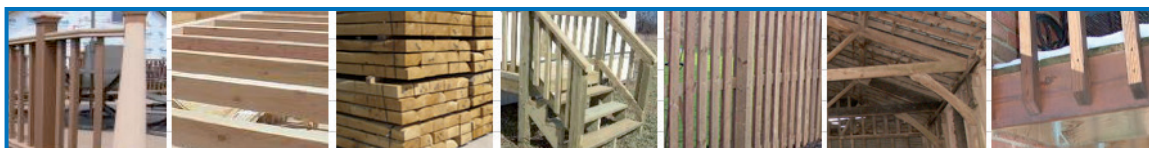

Product Code	Dia (mm)	Length (mm)	Box Qty
TFNP6580	6.5	80	20
TFNP65100	6.5	100	20
TFNP65145	6.5	145	20
TFNP65200	6.5	200	10
TFNP65250	6.5	250	10

Independent tests show that **Timber-Tite®** outlasts inferior outdoor fixings. Constantly aware of new demands, Net-Coat® Green is now further enhanced to meet the specific requirements of the pressure treatments in use today, including ACQ® & Tanalith® E.

Timber-Tite™ Tubs

Product Code	Dia (mm)	Length (mm)	Box Qty
TFNP6580T	6.5	80	200
TFNP65100T	6.5	100	200
TFNP65145T	6.5	145	150
TFNP65200T	6.5	200	100
TFNP65250T	6.5	250	100

THE ULTIMATE ALL PURPOSE SCREW.

We are proud that the Timber Decking and Cladding Association recognises the advances we have made by awarding Timber-Tite® with the highly vaunted DeckMark® accreditation.
